C- Reading Comprehension

5. Read and complete:

Joseph Lister was born in 1827, the son of a rich British merchant. After graduation. Lister worked as a surgeon. Lister was shocked at the number of people who died after surgery. He came across Pasteur's findings about bacteria in the air. At first surgeons worked in ordinary clothes with dirty instruments. Lister discovered carbolic acid which would kill bacteria in wounds and maybe in the air of the operating room. He used carbolic acid in dressings on wounds and heat to kill bacteria on surgical instruments.

6. Read the following passage, then answer the questions:

Video and television are responsible for the declining interest in reading among the young. While they may be harmless in themselves, they do nothing to build up reading skills. If some of the hours children spend watching television were devoted to reading, the population would be better educated.

Watching a story is a totally passive pastime. Someone else has made the decisions about everything in the story. Reading a story is an active partnership between writer and reader. Ideas are sketched and the mind of the reader creates the rest. Watching something is easier.

The problem is that many children read very slowly. They decode a page or two in a class and about the same again for homework. It is hardly surprising that such children then declare that they find reading boring and prefer to watch television. Their difficulty is not reading the words; it is interpreting them. They need to be able
